# Sunday: Growing Rock Candy

**THINGS NEEDED:** Water, Sugar, Bamboo skewer/stick, Glass jar, Clothespin, Pot and Spoon

---

**METHOD:** Bring one cup of water to a boil in a large pot on the stove. Pour in 2 cups of sugar. Boil and continue stirring until sugar dissolves. Allow the solution to cool for 15-20 minutes. Add food color of your choice to the cooled sugar solution (optional)

---

Wet the wooden sticks and roll them around in granulated sugar. Completely dry the sugared stick

---

Pour the cooled solution into one big glass jar or several smaller ones

---

Insert the sugar-covered wooden stick into the center of the glass. Make sure that the stick is not touching any part of the jar. If it does, the candy crystals could get stuck to the bottom or to the sides.

---

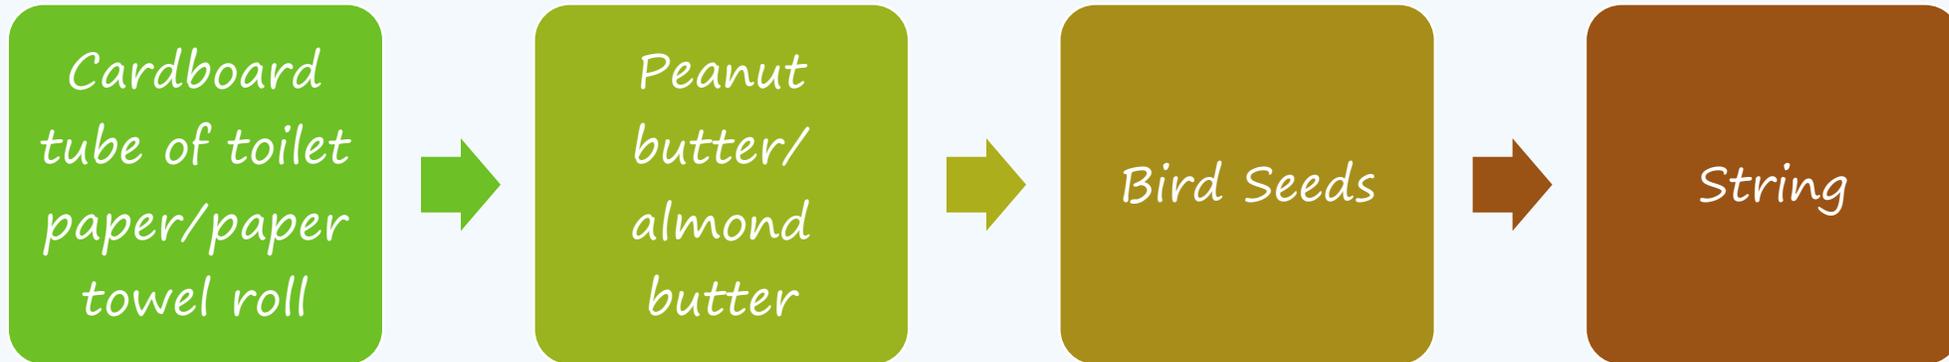

Once in place, secure the stick in place using a clothespin. Cover the top of the glass with a paper towel. You may have to poke a hole in the paper towel for the wooden stick to poke through.

---

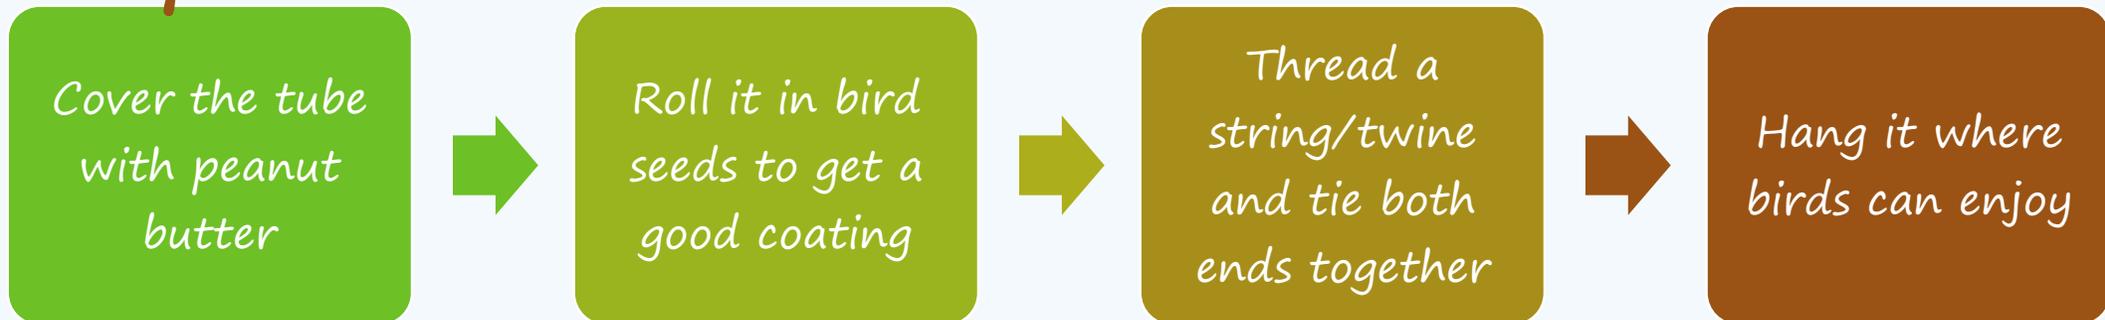

**TIPS:** Place the glass in a cool and quiet place. Loud noises and a lot of movement can disturb the crystal making process. Watch the candy crystals grow larger. When you have a good amount of rock candy crystals (about 2 weeks) remove the stick and place it on a sheet of wax paper to dry
